**WALLEYE™ TECHNOLOGIES ELECTS ANTHONY JENKINS AND WILLIAM WILSON TO ITS BOARD OF DIRECTORS**

*Veteran senior-level executives to support the company's growth and development of new products*

**SOMERVILLE, Mass.—December 28, 2007—**Walleye™ Technologies, a leading developer of handheld and portable millimeter wave imaging systems, announced today that it has elected Anthony Jenkins and William Wilson to the Walleye Technologies Board of Directors.

Tony Jenkins has extensive experience in physical security imaging and in the explosives detection industry, having served as chief operating officer of Ion Trak before the company was sold to General Electric. Bill Wilson is the chief executive officer of Oneida Communications Group and has a great deal of experience in financing companies across different stages of growth.

“We are delighted to have such experienced entrepreneurs as Anthony Jenkins and Bill Wilson join our company and board,” said Chris Adams, chief executive officer of Walleye Technologies. “Walleye will benefit significantly from their experience as they will provide strategic depth to our Board of Directors and aid us as we continue to move forward creating and developing new products.”

**About Walleye Technologies**

Walleye Technologies develops next generation hand-held portable imaging systems capable of “seeing” into and through solid objects. The company’s patent-pending imaging technology platform, the Walleye Imaging System, generates high quality images and has a diversity of applications from consumer to security imaging markets.
